

Wood End Park Academy

Computing Ambassadors

The computing ambassadors run a Wednesday lunch time club for KS2 where they help children with their computing skills and work. Ambassadors help children settle down at a computer, assist them with their log ins and provide them with feedback on any work they maybe completing. Ambassadors have meetings during the term to discuss different ideas, strategies and what they feel has been working well.

During the first ambassadors meeting this academic year, new candidates were interviewed to join the team. Two of the ambassadors from last year held the interviews. They sat down with pupils applying for the roles and then spoke with both Mr Hussain and Mr Dyal regarding who they would like to join the team. They discussed why they thought these pupils were ideal and what they would bring to the team. Three new pupils were selected to join the team who have since been ambassadors of computing at WEPA.

The main project the ambassadors will be focusing on this half term is an internet safety project. In light of the recent internet safety day, pupils will be asked to create a piece of work using a platform of their choice (poster, presentation, quiz etc) to promote internet safety at WEPA. The main purpose of this project is to create awareness about internet safety and to remind us all how important it is to be safe on the internet. The goals for the rest of the year are to ensure all computing rules are being followed, all

equipment is being used in the correct manner and to run a successful computing club during lunch times.
